developed by the Kaggle community can be most impactful in the areas of at-risk population evaluation and capacity management.

Evaluation

One submission will be identified as the best response to the research question posed in this task on the timeline outlined below. That submission will be marked as the “accepted solution” to that task, and will be reevaluated by the next deadline against the new research contributed to that task.

Submissions will be reviewed on a rolling basis, so participants are encouraged to work publicly and collaboratively to accelerate the research available for each task.

Timeline

The Roche Data Science Coalition will be evaluating solutions and surfacing this research to experts on the following schedule:

- Wednesday, April 22nd
- Wednesday, May 6th
- Wednesday, May 20th
